

SHAVING CREAM MARBLED SEA SHELLS

MATERIALS

Variety of Sea Shells
Popsicle Sticks
Food Coloring

Foam Shaving Cream
Tray or Pan
Paper Towels

DIRECTIONS

Fill your tray or pan with shaving cream and add drops of food coloring all over it! Choose what ever colors you would like - or use them all! This project will create beautiful marbled artwork no matter which colors you choose. Once you have finished adding all of your colors, use the Popsicle stick to drag through each color to create the marbled pattern.

Next, drag the top of the shell through the shaving cream scooping a bit up. Using the paper towels, gently wipe off the shaving cream to reveal the dyed shell beneath. Set aside to dry and repeat with as many shells as you'd like! These shells were found at Lobsterville Beach in Aquinnah - it is the perfect place to find more shells to create art with! Have fun!
